

# Patient Aids & Cushions

*Our bodies and lives are ever changing...  
so some Aid here or there is just part of the journey.*

Embrace those changes with helpful and essential products to aid in life.

## The Knee Cruiser

### ITEM # TKC-8

The Nova Knee Cruiser is an excellent mobility device for foot or ankle injuries that require the patient to not put weight on the affected area. It can be a great long or short term alternative to crutches or folding walkers that can have adverse effects such as back or under arm pain from extended use. The Knee Cruiser allows the user to maintain an active and more independent lifestyle, which will help them progress to a quicker recovery.

#### Knee Cruiser Features:

- Oversized contoured padded platform pads (comfortable & long lasting)
- Durable rubber handles
- Steering assembly, which allows the user to easily maneuver and maintain better stability
- Large 8" wheels provide a smooth ride over uneven surfaces
- Locking hand brake provides speed control and allows user to stay in a single position without rolling during everyday tasks
- Quickly adjusts for right or left leg injuries
- Easy to fold down steering column is convenient for transport and compact storage
